TECHNICAL NOTES

The Crops Production Survey (CrPS) is the source of production data of all crops, except palay and corn. Around 280 crops are covered in this survey. For this Special Release, information on mango in llocos Region was reported.

Estimates of production are generated from the CrPS, which is conducted quarterly. The CrPS covers all regions, except the National Capital Region.

Concept and Definition

• Crop production refers to the quantity produced and harvested for a particular crop during the reference period. It includes those measured but damaged, stolen, given away, consumed, given as harvester's share, reserved, etc. It excludes those produced but not harvested due to low price, lack of demand, force majeure, or fortuitous events, etc.
