

SPECIAL RELEASE

PALAY SITUATION IN LA UNION 1ST QUARTER 2024

Date of Release: 20 June 2024

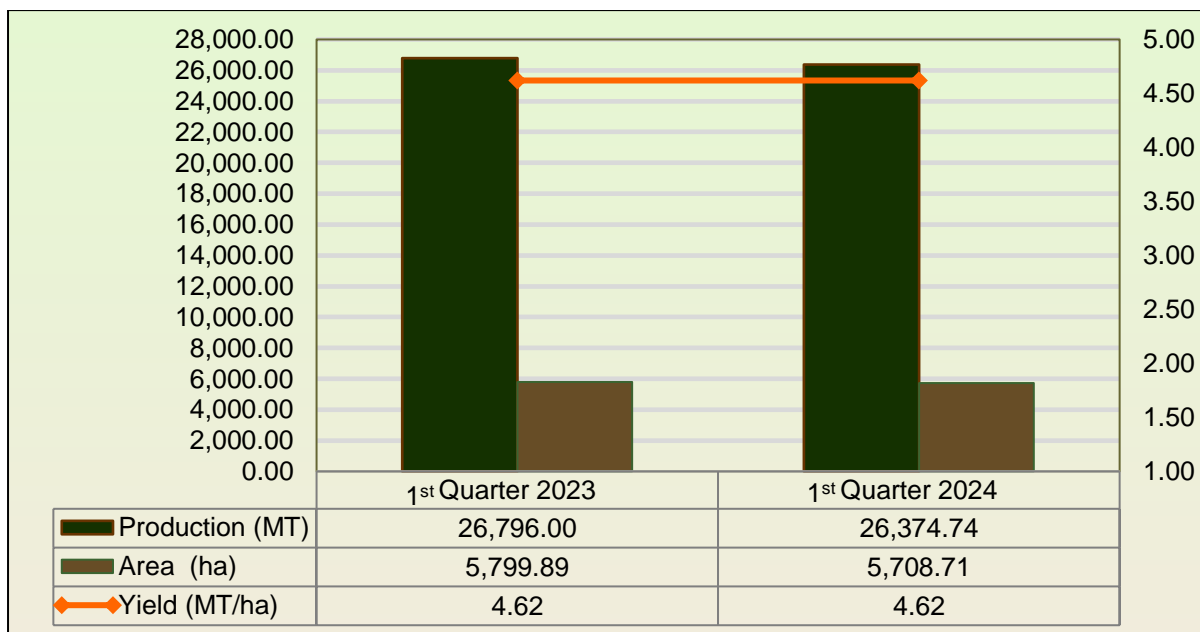

Reference No: 2024-34

Palay production in La Union decreases in 1st quarter 2024

The volume of palay production in La Union in 1st quarter 2024 was recorded at 26,374.74 metric tons. This is 1.57 percent lower than the volume of palay production in the province in the same period of 2023 at 26,796.00 metric tons.

Likewise, the area harvested for palay in the province decreased by 1.57 percent from 5,799.89 hectares in 1st quarter 2023 to 5,708.71 hectares in 1st quarter 2024. The yield per hectare stood at 4.62 metric tons per hectare in 1st quarter 2024.

1st Quarter 2023 and 1st Quarter 2024**

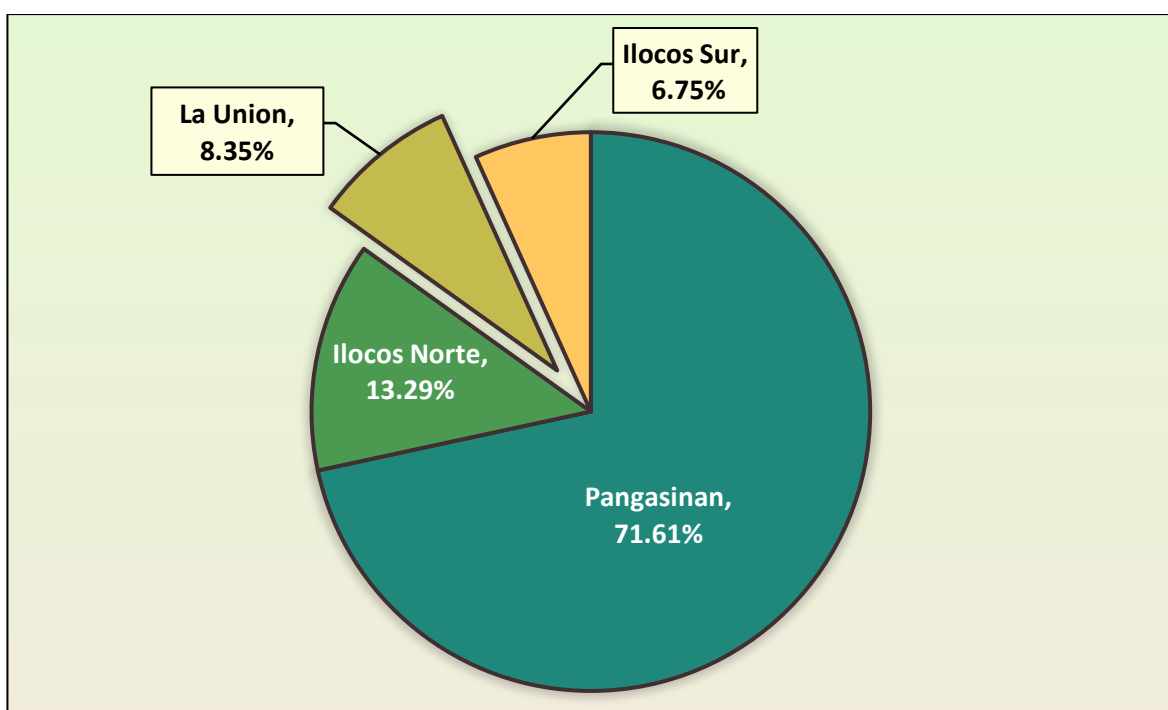

Source: Philippine Statistics Authority, Palay Production Survey

Overall, the volume of palay production in Ilocos Region decreased by 2.16 percent from 323,001.00 metric tons in 1st quarter 2023 to 316,023.74 metric tons in 1st quarter 2024. Among the four provinces of Ilocos Region, Ilocos Sur recorded the least volume of palay production in 1st quarter 2024 with 6.75 percent (21,345.00 metric tons) of the total palay production in the region. Pangasinan accounted for the bulk of palay production in the region with 71.61 percent share (226,320.00 metric tons) followed by Ilocos Norte with 13.29 percent share (41,984.00 metric tons) and La Union with 8.35 percent share (26,374.74 metric tons).

In terms of total area harvested for palay in Ilocos Region, the area decreased by 3.00 percent from 65,911.40 hectares in 1st quarter 2023 to 63,933.71 hectares in 1st quarter 2024. Ilocos Sur had the smallest proportion of the total harvested area for palay in 1st quarter 2024 with 6.63 percent share (4,240.00 hectares). Pangasinan had the largest proportion of the total area harvested for palay in the region with 72.49

percent share (46,344.00 hectares), followed by Ilocos Norte with 11.95 percent share (7,641.00 hectares), and La Union with 8.93 percent share (5,708.71 hectares).

Figure 3. Percent Distribution of Area Harvested for Palay by Province, Ilocos Region: 1st Quarter 2024

Source: Philippine Statistics Authority, Palay Production Survey

By ecosystem, the volume of palay produced from irrigated farms in La Union in 1st quarter 2024 was 26,374.74 metric tons. This posted a decrease of 1.57 percent from the 26,796.00 metric tons volume of palay production from irrigated farms in 1st quarter 2023. Meanwhile, there is no palay produced from rainfed farms in the province in 1st quarter 2024.

STATISTICAL TABLES

**Table 1. Volume of Production for Palay and Percent Share by Province
Ilocos Region: 1st Quarter 2023 and 1st Quarter 2024**

Area	1 st Quarter 2024		1 st Quarter 2023	
	Production (MT)	Share (%)	Production (MT)	Share (%)
Ilocos Region	316,023.74	100.00	323,001.00	100.00
Ilocos Norte	41,984.00	13.29	44,316.00	13.72
Ilocos Sur	21,345.00	6.75	20,990.00	6.50
La Union	26,374.74	8.35	26,796.00	8.30
Pangasinan	226,320.00	71.61	230,899.00	71.49

TECHNICAL NOTES

Palay Production Survey (PPS) is a quarterly survey that generates estimates and forecasts data on production, area and yield of palay. The survey gathers information on the area planted/harvested and production by ecosystem; monthly distribution of production and area harvested; farm household disposition/utilization of production; area of standing crop; use of seeds, fertilizers and pesticides; and awareness and availment of program interventions.

Reference Periods

January Survey round – October to December

April Survey round – January to March

July Survey round – April to June

October Survey round – July to September

Production refers to the quantity produced and actually harvested for a particular crop during the reference period.

Area Harvested refers to the actual area from which harvest are realized during the reference period.

Irrigated Farms refer to area with irrigation facilities supplying water through artificial means like gravity, force/power, pump, etc. Irrigated area become rainfed only, when the irrigation system is no longer operational for the past two years and beyond repair and there is no plan of irrigating the farm.

Rainfed Farms refer to area that holds standing water but solely dependent on rainfall for its water supply. It may have dikes that retain rainwater.

Yield refers to the measurement of the amount of agricultural production harvested per unit of land area.
