2016 REGIONAL DEVELOPMENT INDICATORS (PRELIMINARY REPORT)

INTRODUCTION:

Regional Development Indicators

- ➢ the replicate of StatDev at the regional level
- ➢ it aims to support the monitoring of the region's development efforts
- ➢ it also aims to monitor the achievements of the economic and social development goals set forth in the Regional Development Plan (RDP)
- ➢ it includes relevant outcome and output indicators in the RDP/RDA
- ➢ indicators will be revised each time a new plan is formulated
- ➢ indicators are grouped according to the RDP sectors
- ➢ it features regional indicators with provincial disaggregation, if available
- ➢ only Region I among 18 regions in the country has localized version of the StatDev

COMPUTATION FOR PACE OF PROGRESS

Indicators with Targets

$$\text{pace of performance} = \frac{\text{actual annual growth rate}}{\text{required annual growth rate}}$$

where:

$$\text{actual annual growth rate} = \frac{(\text{latest data / baseline data}) - 1}{\text{number of years elapsed}}$$

$$\text{required annual growth rate} = \frac{\text{target rate}}{\text{number of years covered}}$$

If the pace of performance is:

more than 0.9	----	good performance
between 0.5 and 0.9	----	average performance
less than 0.5	----	poor performance

3

Indicators without Targets

The slope of the latest and baseline data will be the basis

$$\text{slope} = \frac{\text{latest data - baseline data}}{\text{number of years elapsed}}$$

If the value of slope is:

more than 1 (upward)	---- good performance
between 1 and −1 (horizontal)	---- average performance
less than −1 (downward)	---- poor performance

GRAPHICAL PRESENTATION OF PERFORMANCE

Good performance — means that the target has already been reached or the probability of attaining the target is high and thus, the target is likely to be attained

average performance — means that the probability of attaining the target is medium and thus, the target may or may not be attained

poor performance — means that the probability of attaining the target is low
